Thanks. I can't seem to find the paper from Boyd. Did you send it to me? Or someone else?

Thanks

Good day,

You are cordially invited to attend a presentation on Permanent Solutions to Achieve High Quality Water in the Upper Animas River. Please see attached invitation for details.

The presentation will outline a range of practical, cost–effective solutions to be conducted on a phased basis leading to permanent restoration of water quality. A Q&A and discussion on the way forward will follow.

This presentation has been developed by the John T. Boyd Company (BOYD), international minerals consultants. It will be presented by Greg Sparks, P.E., Managing Director – Metals, for the company. Greg is a Colorado registered professional engineer and a long-time resident of Durango, Colorado. He has great familiarity with the Silverton Mining District and the challenges it presents toward achieving sustainable high quality water in the upper Animas River. Backed by the team of practical professionals at BOYD, Greg will present workable, cost–effective solutions to meet these challenges sustainably in the near term.

Please e-mail regrets only to g-gaworo@jtboyd.com . This is a limited venue so we would like to make room for others if you cannot attend.

Sincerely,

Gina Gaworowski for:

Gregory B. Sparks, P.Eng., Q.P.
Managing Director - Metals
